Preparing your Quilt

Quilt Top

- Remove all selvages and threads.
- Press well.
- Identify the top of your quilt with a safety pin or label.
- Check that your borders accurately fit the quilt* and correct if necessary.

* Measure the top and bottom edges and across the center of the quilt. These three measurements should be the same.

Backing Material

Backing material should measure a total of 6"-8" longer than the width and length of the quilt top.

Basting

Basting or pinning your quilt is not necessary.

To wash or not to wash

Whether to pre-wash your materials is up to you! Completed quilts which have not been pre-washed will look more "antique" when washed after quilting as the materials shrink. If you wash your quilt top materials, you DO want to wash your quilt backing materials.
